

## Vial forming machine RP 18 with automatic tube feeder

PRINT

### Vertical 18/10-heads indexing motion machine for the production of tubular glass vials

#### Technical Data

##### ■ Operating range

Working range of chucks: Ø 10 - 29 mm

other working ranges on request

Length of finished vial

min. 20 mm cylindrical length

max. 115 mm total length

higher total length on request

For the production of tubular glass vials with all main types of vial necks, such as penicillin neck, screw neck and blow back neck.

##### ■ Output

Up to 3.600 pieces per hour depending on the diameter of the glass (max. mechanical speed).

##### ■ Dimensions and weight

Length: 1.582 mm

Width: 1.530 mm

Height with automatic  
tube feeder: 3.350 mm

Weight: 2.100 kg

##### ■ Consumption

Consumption values for gas, air and oxygen depend on the glass tube and the type of gas used. Detailed information will be supplied on request.

##### ■ Features

High-Speed Index Drive HSI

##### ■ Option

Alkalinity lowering system

For feeding the glass tubes into the magazine directly from tubing bundle.
